Steady

The flood risk is VERY LOW despite increasingly unsettled conditions.

Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days, despite the potential for some heavy rain by the end of the week, particularly in the south and west of England and Wales.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days. Large waves will affect the south and west coasts of the UK from Wednesday, however any impacts are expected to be minimal.

Rivers

The river flood risk is VERY LOW for the next five days, despite the potential for some heavy rain by the end of the week, particularly in the south and west of England and Wales.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

IMPACT					
		VERY LOW	LOW	MEDIUM	HIGH
OVERALL FLOOD RISK					

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
