Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days.

Rain, occasionally heavy, is expected across south and south-west England today (Sunday) into Monday. Minor impacts are possible, though the overall flood risk remains VERY LOW.

Further scattered heavy showers will then develop across other parts of the south of England on Monday. Any impacts from these are most likely to be minimal.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days. Exposed coasts of the south-west and north-east of England may be affected by spray or wave overtopping at times, but any impacts are expected to be minimal.

Rivers

The river flood risk is VERY LOW for the next five days, despite the potential for heavy rain at times today (Sunday) and on Monday.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

	MEDIUM				
	LOW				
	VERY LOW				
		MINIMAL	MINOR	SIGNIFICANT	SEVERE
IMPACT					
		VERY LOW	LOW	MEDIUM	HIGH
OVERALL FLOOD RISK					

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
