Increased

Minor surface water flooding impacts are possible but not expected in parts of southern and central England on Friday. The overall flood risk remains VERY LOW for the next five days.

Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days. Scattered showers may affect parts of southern and central England later on Thursday, with further heavy showers likely to develop during the day on Friday. Minor surface water flooding impacts are possible, but are not expected, in parts of southern and central England on Friday.

Rivers

The river flood risk is VERY LOW for the next five days. Small rivers may respond to heavy showers on Friday, especially in more urbanised areas, but any impacts are expected to be minimal.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

	MEDIUM				
	LOW				
	VERY LOW				
		MINIMAL	MINOR	SIGNIFICANT	SEVERE
IMPACT					
		VERY LOW	LOW	MEDIUM	HIGH
OVERALL FLOOD RISK					

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
