Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days. Isolated heavy showers may affect parts of central and northern England and Wales today (Friday) - refer to specific areas of concern map 1. Isolated minor impacts are possible.

During Monday and Tuesday, isolated minor impacts are possible but not expected due to spells of heavy rainfall in the south and west of both England and Wales.

Rivers

The river flood risk is VERY LOW for the next five days. Small rivers may respond to heavy showers today (Friday), especially in more urbanised areas, but any impacts are expected to be minimal.

During Monday and Tuesday, isolated minor impacts are possible but not expected due to spells of heavy rainfall in the south and west of both England and Wales.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood Guidance Statement

Flood risk matrix

LIKELIHOOD	HIGH				
	MEDIUM				
	LOW				
	VERY LOW				
		MINIMAL	MINOR	SIGNIFICANT	SEVERE
IMPACT					
		VERY LOW	LOW	MEDIUM	HIGH
OVERALL FLOOD RISK					

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
