Area of Concern Map 1 - Sunday 28 to Monday 29 May

RISK AREA **A**

Impact **SIGNIFICANT**

Likelihood **LOW**

Source River Surface
Likely duration 2 Days

From Sunday afternoon into Monday morning. Urban areas most at risk.

Assessment of flood risk

Surface water

Localised significant surface water flooding impacts are possible today (Sunday) and Monday in Area A on Area of Concern Map 1, particularly in urban areas. This is due to the potential for torrential thunderstorms to develop across parts of England and Wales and move north-eastwards.

Rivers

Localised significant river flooding impacts are possible but not expected in Area A on Area of Concern Map 1 for today (Sunday) and into Monday. Any impacts will be restricted to small, fast responding catchments and urban watercourses. This is due to the potential for torrential thunderstorms to develop across parts of England and Wales and move north-eastwards.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.
