Wednesday

28 Jun 2017

Increased

The overall flood risk remains VERY LOW for the next five days. Minor impacts are possible but not expected from river and surface water flooding across England and Wales from late Monday to Wednesday.

Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days.

Minor impacts are possible but not expected later on Monday and through Tuesday and again on Wednesday with the potential for heavy rain and thundery downpours to cause surface water flooding especially in urban areas across England and Wales.

Rivers

The river flood risk is VERY LOW for the next five days.

Minor impacts are possible but not expected later on Monday and through Tuesday and again on Wednesday with the potential for heavy rain and thundery downpours to cause rapid river response, especially in small, urban catchments across England and Wales.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days despite a period of high astronomical tides this weekend.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood Guidance Statement

Flood risk matrix

LIKELIHOOD	HIGH				
	MEDIUM				
	LOW				
	VERY LOW				
		MINIMAL	MINOR	SIGNIFICANT	SEVERE
IMPACT					
		VERY LOW	LOW	MEDIUM	HIGH
OVERALL FLOOD RISK					

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
