Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days.

Minor surface water flooding impacts are possible on Friday. Refer to Specific Areas of Concern Map 1.

In the north of England today and in Wales and the south west of England on Friday further minor impacts are possible, but not expected.

Rivers

The surface water flood risk is VERY LOW for the next five days.

Minor river water flooding impacts are possible on Friday. Refer to Specific Areas of Concern Map 1.

In the north of England today and Wales and the south west of England on Friday further minor impacts are possible, but not expected.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days despite some large waves affecting the north-east coast of England early today (Thursday) and in the south west tomorrow morning.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood Guidance Statement

10:30hrs Thursday 29 June 2017

Flood risk matrix

LIKELIHOOD	HIGH				
	MEDIUM				
	LOW				
	VERY LOW				
		MINIMAL	MINOR	SIGNIFICANT	SEVERE
IMPACT					
		VERY LOW	LOW	MEDIUM	HIGH
OVERALL FLOOD RISK					

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
