Assessment of flood risk

Surface water

The surface water flood risk is LOW for the next five days.

Across much of England and Wales on Thursday local significant surface water flooding impacts are possible but not expected within all areas highlighted yellow. The flood risk continues in eastern England into the early hours of Friday morning. This is as a result of isolated torrential downpours from thunderstorms.

Rivers

The river flood risk is LOW for the next five days.

Across much of England and Wales on Thursday local significant river flooding impacts are possible but not expected within all areas highlighted yellow. The flood risk continues in eastern England into the early hours of Friday morning. Any flooding impacts are most likely in small fast responding and urban catchments. This is as a result of isolated torrential downpours from thunderstorms.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood Guidance Statement

10:30hrs Tuesday 04 July 2017

Flood risk matrix

LIKELIHOOD	HIGH				
	MEDIUM				
	LOW				
	VERY LOW				
		MINIMAL	MINOR	SIGNIFICANT	SEVERE
IMPACT					
		VERY LOW	LOW	MEDIUM	HIGH
OVERALL FLOOD RISK					

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
