Increased

Minor surface water and river flooding impacts are possible but not expected across the south of England on Tuesday. The overall flood risk remains VERY LOW for the next five days.

Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days.

Minor surface water flooding impacts are possible across the south of England, but not expected. This is as a result of scattered thunderstorms which may develop later Tuesday. Urban areas are at most risk.

Rivers

The river flood risk is VERY LOW for the next five days.

Minor river flooding impacts are possible across the south of England, but not expected. This is as a result of scattered thunderstorms which may develop later Tuesday. Small and urban catchments are at most risk.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.
