Increased

Local minor surface water and river flooding impacts are possible but not expected across the south of England on Tuesday and for parts of England and Wales on Wednesday.

Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days.

Local minor surface water flooding impacts are possible, but not expected, across the south of England later Tuesday and for parts of England and Wales on Wednesday. This is as a result of scattered thunderstorms which may develop across these areas. Urban locations are at most risk.

Rivers

The river flood risk is VERY LOW for the next five days.

Local minor river flooding impacts are possible, but not expected, across the south of England later Tuesday and for parts of England and Wales on Wednesday. This is as a result of scattered thunderstorms which may develop across these areas. Small and urban catchments are at most risk.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.
