Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days.

Minor surface water flooding impacts are possible across parts of England and Wales today (Sunday) from slow-moving thundery showers. See Risk Area A on Specific Areas of Concern Map 1 for the locations with the highest likelihood of being affected.

Rivers

The river flood risk is VERY LOW for the next five days.

Minor river flooding impacts are possible but not expected across parts of England and Wales today (Sunday) from slow-moving thundery showers. Any river response would be limited to fast responding or urban catchments.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days despite a period of high astronomical tides peaking on Monday and Tuesday.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

IMPACT					
		VERY LOW	LOW	MEDIUM	HIGH
OVERALL FLOOD RISK					

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
