Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days, despite the potential for heavy rainfall at times today (Saturday) and on Sunday.

Local minor surface water impacts are possible in parts of England and Wales later today (Saturday) and early on Sunday (as shown in Area A on Specific Area of Concern Map 1). This is due to an area of heavy, possibly thundery, rain. Across the south-east of England local minor surface water impacts are possible but not expected due to heavy showers during the same period.

Local minor surface water flooding impacts are also possible but not expected for parts of England and Wales at times during Sunday, due to heavy thundery showers.

Rivers

The river flood risk is VERY LOW for the next five days, despite the potential for heavy rainfall at times today (Saturday) and on Sunday.

Local minor river flooding impacts are possible in parts of England and Wales later today (Saturday) and early on Sunday (as shown in Area A on Specific Area of Concern Map 1). This is due to an area of heavy, possibly thundery, rain. Across the south-east of England local minor river flooding impacts are possible but not expected due to heavy showers during the same period. Any impacts will mainly be across urban and fast responding catchments.

Local minor river flooding impacts are also possible but not expected for parts of England and Wales at times during Sunday, due to heavy thundery showers.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

LIKELIHOOD	HIGH				
	MEDIUM				
	LOW				
	VERY LOW				
		MINIMAL	MINOR	SIGNIFICANT	SEVERE
IMPACT					
		VERY LOW	LOW	MEDIUM	HIGH
OVERALL FLOOD RISK					

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
