The flood risk is VERY LOW for the next five days.

Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days, despite some persistent rain and heavy showers at times.

Minor surface water flooding impacts are possible but not expected on Tuesday in south-east England. This is due to the potential for thunderstorms. Elsewhere and at other times impacts are expected to be minimal.

Rivers

The river flood risk is VERY LOW for the next five days.

Despite some persistent rain and heavy showers at times any river flooding impacts are expected to be minimal.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.
