Steady

Minor surface water impacts are possible but not expected in the north-west of England and Wales today (Wednesday). The overall flood risk for England and Wales for the next five days is VERY LOW.

Assessment of flood risk

Surface water

Minor impacts are possible but not expected from surface water today (Wednesday) in the north-west of England and Wales. This is a result of heavy showers.

The overall surface water flood risk is VERY LOW for the next five days.

Rivers

The overall river flood risk is VERY LOW for the next five days despite some locally heavy showers in the north-west of England and Wales today (Wednesday).

Coastal/Tidal

The overall coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood Guidance Statement

10:30hrs Wednesday 13 September 2017

Flood risk matrix

LIKELIHOOD	HIGH				
	MEDIUM				
	LOW				
	VERY LOW				
		MINIMAL	MINOR	SIGNIFICANT	SEVERE
IMPACT					
		VERY LOW	LOW	MEDIUM	HIGH
OVERALL FLOOD RISK					

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
