The overall flood risk for England and Wales for the next five days is VERY LOW. See end of FGS for 6-10 day forecast.

Assessment of flood risk

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Strong winds and large waves are expected along exposed parts of the east coast of England on Sunday. Despite this only minimal impacts are currently expected, including the possibility of some isolated instances of spray or wave overtopping along the exposed North Norfolk coast.

Surface water

Heavy rain is possible in Cumbria from late Monday into Tuesday. However, the surface water flood risk is VERY LOW for the next five days.

Rivers

Heavy rain is possible in Cumbria from late Monday into Tuesday. However, the river flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood Guidance Statement

6-10 day forecast

There is a possibility of a heightened coastal flood risk for parts of the east coast of England on Thursday (2 November), due to the potential for strong northerly winds coinciding with increasing astronomical tides.

Flood risk matrix

LIKELIHOOD	HIGH				
	MEDIUM				
	LOW				
	VERY LOW				
		MINIMAL	MINOR	SIGNIFICANT	SEVERE
IMPACT					
		VERY LOW	LOW	MEDIUM	HIGH
OVERALL FLOOD RISK					

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
