Steady

Minor coastal flooding impacts are possible but not expected for parts of the English and Welsh coast today (Monday) and on Tuesday. The overall flood risk remains VERY LOW.

Assessment of flood risk

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

From later Monday and into Tuesday morning, minor coastal flooding impacts are possible but not expected for parts of the north-west coast of England and the west and south coasts of Wales. During this period there is the potential for gale force winds, elevated surge and large waves around the times of high water leading to the potential for some minor impacts in places.

Later on Thursday and during Friday unsettled conditions in the North Sea may lead to some positive surge for the coast of East Anglia, however any impacts are currently expected to be minimal.

Surface water

The surface water flood risk is VERY LOW for the next five days.

Rivers

The river flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood Guidance Statement

10:30hrs Monday 06 November 2017

Flood risk matrix

LIKELIHOOD	HIGH				
	MEDIUM				
	LOW				
	VERY LOW				
		MINIMAL	MINOR	SIGNIFICANT	SEVERE
IMPACT					
		VERY LOW	LOW	MEDIUM	HIGH
OVERALL FLOOD RISK					

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
