Increased

Local minor coastal flooding impacts are possible but not expected for parts of the East Coast on Saturday and Sunday. The overall flood risk for England and Wales for the next five days is VERY LOW.

Assessment of flood risk

Coastal/Tidal

Some minor coastal flooding impacts are possible but not expected for parts of the East Coast of England on Saturday and Sunday, due to the potential for a positive surge to coincide with times of high tide in some locations.

Despite this the overall coastal/tidal flood risk remains VERY LOW for the next five days.

Surface water

The surface water flood risk is VERY LOW for the next five days despite the possibility of some widespread and locally heavy rain later on Sunday.

Rivers

The river flood risk is VERY LOW for the next five days despite the possibility of some widespread and locally heavy rain later on Sunday.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

LIKELIHOOD	HIGH				
	MEDIUM				
	LOW				
	VERY LOW				
		MINIMAL	MINOR	SIGNIFICANT	SEVERE
IMPACT					
		VERY LOW	LOW	MEDIUM	HIGH
OVERALL FLOOD RISK					

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
