Increased

Local minor river and surface water flooding impacts are possible but not expected for parts of Wales and the north of England on Wednesday. The overall flood risk for England and Wales for the next five days is VERY LOW.

Assessment of flood risk

Rivers

Some minor river flooding impacts are possible but not expected for parts of Wales and the north of England on Wednesday due to the possibility of heavy rain falling across these areas. In some catchments this rain will fall onto already saturated ground.

Despite this, the river flood risk remains VERY LOW for the next five days.

Surface water

Some minor surface water flooding impacts are possible but not expected for parts of Wales and the north of England on Wednesday due to the possibility of heavy rain falling across these areas.

Despite this, the surface water flood risk remains VERY LOW for the next five days.

Coastal/Tidal

The coastal flood risk is VERY LOW for the next five days.

Positive surge in the North Sea will elevate the water level at times of high tide for some locations along the East Coast of England this weekend. Despite this, only minimal impacts are expected.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood Guidance Statement

10:30hrs Saturday 18 November 2017

Flood risk matrix

LIKELIHOOD	HIGH				
	MEDIUM				
	LOW				
	VERY LOW				
		MINIMAL	MINOR	SIGNIFICANT	SEVERE
IMPACT					
		VERY LOW	LOW	MEDIUM	HIGH
OVERALL FLOOD RISK					

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
