Steady

Significant river and surface water flooding impacts are possible but not expected in parts of the north of England on Wednesday and Thursday. The overall flood risk is **LOW**.

Specific Areas of Concern Map 1 - Wednesday 22 to Thursday 23 November 2017

RISK AREA A

Impact **SIGNIFICANT**

Likelihood **VERY LOW**

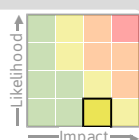

Source River Surface
Likely duration 2 Days

Impacts from Wednesday to early Thursday.

RISK AREA B

Impact **SIGNIFICANT**

Likelihood **VERY LOW**

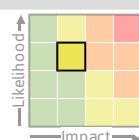

Source River
Likely duration 2 Days

Impacts from Wednesday to early Thursday.

RISK AREA C

Impact **MINOR**

Likelihood **MEDIUM**

Source River Surface
Likely duration 2 Days

Impacts from Wednesday to early Thursday.

RISK AREA D

Impact **MINOR**

Likelihood **LOW**

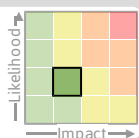

Source River Surface
Likely duration 2 Days

Impacts from Wednesday to early Thursday.

RISK AREA E

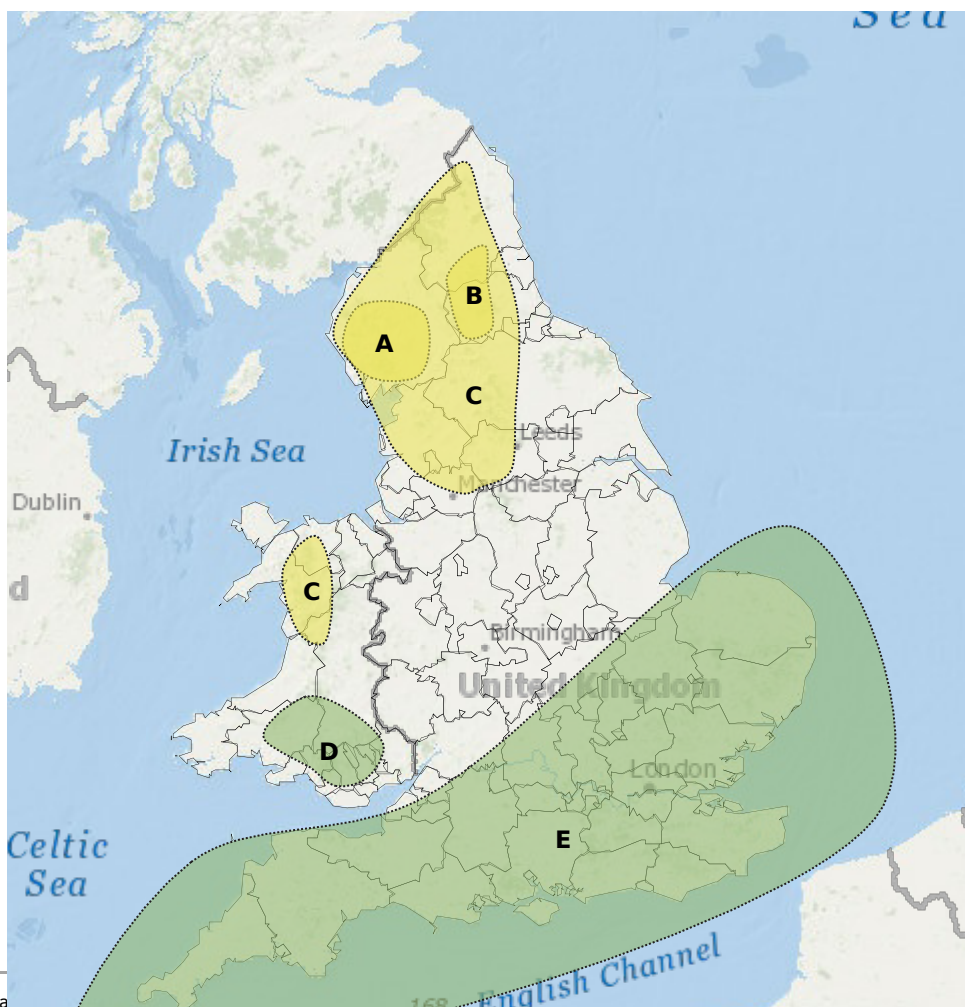

Impact **MINOR**

Likelihood **LOW**

Source Surface
Likely duration 2 Days

Impacts possible later today into Thursday morning, urban areas most at risk.

Assessment of flood risk

Rivers

Significant river flooding impacts are possible but not expected across parts of the north of England during Wednesday and into early Thursday due to heavy and persistent rain falling across high ground in these areas. See Risk Areas A and B in Specific Areas of Concern Map 1.

Minor river flooding impacts are probable for the same period in Risk Areas C and possible in Risk Area D.

The overall river flood risk is LOW on Wednesday and Thursday.

Minor river flooding impacts are possible but not expected across parts of the south of England on Saturday due to heavy rain.

Surface water

Significant surface water flooding impacts are possible but not expected in Risk Area A in Specific Areas of Concern Map 1 during Wednesday and into early Thursday, due to heavy and persistent rainfall.

Minor surface water flooding impacts are probable elsewhere in the north of England and the north-west of Wales during the same period. See Risk Areas C in Specific Areas of Concern Map 1. This brings a LOW surface water flood risk overall.

During the same period in Risk Area D minor surface water flooding impacts are possible. Elsewhere through parts of Wales and also in the south-west of England minor surface water flooding impacts are possible but not expected.

Additionally minor surface water flooding impacts are possible from heavy showers locally affecting parts of the south of England - see Risk Area E in Specific Areas of Concern Map 1.

Minor surface water flooding impacts are possible but not expected across parts of the south of England on Saturday due to heavy rain.

Coastal/Tidal

The coastal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood Guidance Statement

10:30hrs Wednesday 22 November 2017

Flood risk matrix

LIKELIHOOD	HIGH				
	MEDIUM				
	LOW				
	VERY LOW				
		MINIMAL	MINOR	SIGNIFICANT	SEVERE
IMPACT					
		VERY LOW	LOW	MEDIUM	HIGH
OVERALL FLOOD RISK					

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
