Steady

Wednesday

29 Nov 2017

Steady

Thursday

30 Nov 2017

Steady

The overall flood risk is VERY LOW for the next five days.

Assessment of flood risk

Rivers

The river flood risk is VERY LOW for the next five days, despite further unsettled weather at times.

An area of heavy rainfall will affect the north and west of England and much of Wales later on Sunday and into Monday. Local minor river flood impacts are possible but not expected across parts of Wales and where rain and any snowmelt combine in the South Pennines and Peak District.

Coastal/Tidal

The coastal flood risk is VERY LOW for the next five days. Strong winds and large waves may lead to some wind blown spray and overtopping locally, along the Yorkshire coast on Tuesday, Wednesday and Thursday. However, only minimal impacts are expected.

Surface water

The surface water flood risk is VERY LOW for the next five days, despite heavy rainfall affecting parts of the north and west of England and Wales later on Sunday and into Monday,

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

LIKELIHOOD	HIGH				
	MEDIUM				
	LOW				
	VERY LOW				
		MINIMAL	MINOR	SIGNIFICANT	SEVERE
IMPACT					
		VERY LOW	LOW	MEDIUM	HIGH
OVERALL FLOOD RISK					

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
