The overall flood risk is VERY LOW for the next five days. See end of FGS for 6-10 day forecast.

Assessment of flood risk

Coastal/Tidal

The coastal flood risk is VERY LOW for the next five days.

High spring tides will lead to high water levels from Sunday through to Wednesday. Despite conditions turning more unsettled from Wednesday, any impacts are currently expected to be minimal.

Rivers

The river flood risk is VERY LOW for the next five days, despite conditions turning more unsettled from Wednesday.

Surface water

The surface water flood risk is VERY LOW for the next five days, despite conditions turning more unsettled from Wednesday.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood Guidance Statement

10:30hrs Saturday 02 December 2017

FLOODFORECASTINGCENTRE

a working partnership between

6-10 day forecast

Unsettled conditions later next week could lead to some river flooding in northern England and perhaps north Wales. This more unsettled weather also coincides with the end of the high spring tide period and large waves and positive surge could lead to some coastal flooding too.

Flood risk matrix

LIKELIHOOD	HIGH				
	MEDIUM				
	LOW				
	VERY LOW				
		MINIMAL	MINOR	SIGNIFICANT	SEVERE
IMPACT					
		VERY LOW	LOW	MEDIUM	HIGH
OVERALL FLOOD RISK					

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
