Assessment of flood risk

Rivers

Minor river flooding impacts are possible today (Friday) in Area A in Specific Areas of Concern Map 1, as river levels rise here after recent rain and snowmelt.

Further rain may combine with snowmelt across high ground in Wales and the north of England on Sunday and Monday. Some local river flooding is possible but impacts are expected to be minimal.

The overall river flood risk remains VERY LOW.

Coastal/Tidal

Minor coastal flooding impacts are possible but not expected, due to gale force winds and large waves for the south-west of England today.

The coastal flood risk is VERY LOW for the next five days.

Surface water

The surface water flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood Guidance Statement

Flood risk matrix

LIKELIHOOD	HIGH				
	MEDIUM				
	LOW				
	VERY LOW				
		MINIMAL	MINOR	SIGNIFICANT	SEVERE
IMPACT					
		VERY LOW	LOW	MEDIUM	HIGH
OVERALL FLOOD RISK					

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
