Minor coastal impacts are possible along some coastal areas today (Saturday). The overall flood risk is VERY LOW.

Specific Areas of Concern Map 1: Saturday 6 January

RISK AREA A

Impact **MINOR**

Likelihood **LOW**

Source Coastal/Tidal

Likely duration 1 Day

High tides combined with high river levels on the lower River Severn.

RISK AREA B

Impact **MINOR**

Likelihood **LOW**

Source Coastal/Tidal

Likely duration 1 Day

Impacts around times of high water. Large waves at times.

Assessment of flood risk

Coastal/Tidal

The coast/tidal flood risk is VERY LOW for the next five days.

Today (Saturday), minor flood impacts are possible in Area A on Specific Areas of Concern Map 1, as high river levels on the lower River Severn combine with high tides.

Minor coastal flood impacts due to large waves and spring tides are also possible today in the north-east of England and along the Cornwall coast - where some local defences have been degraded by recent storms. This is shown by Areas B on Specific Areas of Concern Map 1.

Rivers

The river flood risk is VERY LOW for the next five days despite rivers in the west of the Midlands and the lower Severn remaining elevated for the next few days.

Surface water

The surface water flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

IMPACT					
		VERY LOW	LOW	MEDIUM	HIGH
OVERALL FLOOD RISK					

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
