Assessment of flood risk

Rivers

The river flood risk is VERY LOW for the next five days.

Local minor river flooding impacts are possible on Monday morning in Areas A on Specific Areas of Concern Map 1 and are possible but not expected in south-west England. This is due to heavy rain during Sunday night into Monday morning falling onto near saturated river catchments. Smaller, fast responding rivers in these areas are expected to be most prone.

Local minor river flooding impacts are possible but not expected in the south-west of England tomorrow (Saturday) due to heavy rain.

Surface water

The surface water flood risk is VERY LOW for the next five days.

Local minor surface water flooding impacts are possible on Monday morning in Areas A on Specific Areas of Concern Map 1, and are possible but not expected in south-west England. This is due to heavy rain during Sunday night into Monday morning falling onto near saturated river catchments.

Local minor surface water flooding impacts are possible but not expected in the south-west of England tomorrow (Saturday) due to heavy rain. Urban areas are most prone.

Coastal/Tidal

The coast/tidal flood risk is VERY LOW for the next five days, despite strong winds and the risk of large waves in the west and south at times, particularly Devon and Cornwall coasts later on Tuesday.

Groundwater

The groundwater flood risk is VERY LOW for the next five days. Groundwater levels in parts of the south of England are likely to rise in response to the forecast rainfall but no impacts are expected.

Flood Guidance Statement

Flood risk matrix

LIKELIHOOD	HIGH				
	MEDIUM				
	LOW				
	VERY LOW				
		MINIMAL	MINOR	SIGNIFICANT	SEVERE
IMPACT					
		VERY LOW	LOW	MEDIUM	HIGH
OVERALL FLOOD RISK					

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
