Increased

Minor surface water and river flooding impacts are possible but not expected on Sunday and Monday. The overall flood risk remains VERY LOW for the next five days.

Assessment of flood risk

Surface water

Local minor surface water flooding impacts are possible but not expected for parts of England and Wales on Sunday and Monday. This is due to the potential for frequent heavy, thundery showers.

The surface water flood risk remains VERY LOW.

Rivers

Local minor river flooding impacts are possible but not expected for small, fast responding or urban catchments in parts of England and Wales on Sunday and Monday. This is due to the potential for frequent heavy, thundery showers.

The river flood risk remains VERY LOW.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Groundwater levels remain high across parts of Hampshire and West Berkshire. However, following the recent dry weather, levels are expected to continue falling in most locations.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.
