Significant surface water impacts are possible but not expected on Friday, Saturday and Sunday. The overall flood risk is LOW.

Specific Area of Concern Map 1 - Friday 25 May 2018

RISK AREA A

Impact **MINOR**

Likelihood **LOW**

Source River Surface

Likely duration 1 Day

Impacts possible on Friday afternoon and evening.

RISK AREA B

Impact **SIGNIFICANT**

Likelihood **VERY LOW**

Source River Surface

Likely duration 1 Day

Potential impacts in the afternoon and evening. Urban areas most prone.

Specific Areas of Concern Map 2 - Saturday 26 and Sunday 27 May 2018

RISK AREA C
Impact **SIGNIFICANT**
Likelihood **VERY LOW**

Source River Surface
Likely duration 2 Days

Urban areas most prone.

Specific Areas of Concern Map 3 - Monday 28 to Tuesday 29 May 2018

RISK AREA D
Impact **MINOR**
Likelihood **LOW**

Source River Surface
Likely duration 2 Days

Urban areas most prone.

Assessment of flood risk

Surface water

The surface water flood risk is LOW for today (Friday), Saturday and Sunday.

Local significant surface water impacts are possible but not expected at times for parts of England and Wales from this afternoon until later Sunday. See Specific Areas of Concern Maps 1 and 2 for locations at risk on each day. This is due to scattered heavy thunderstorms which may become heavier and more widespread through the weekend. Urban areas are most prone and not all locations within the risk areas will experience impacts.

Minor surface water impacts are also possible for other areas in Area A on Specific Areas of Concern Map 1 this afternoon and evening, and again on Monday and Tuesday (See Specific Areas of Concern Map 3).

Rivers

The river flood risk in urban areas is LOW for Saturday and Sunday.

Local significant river flooding impacts are possible but not expected at times for parts of England and Wales on Saturday and Sunday. See Specific Areas of Concern Map 2 for locations at risk. This is due to scattered heavy thunderstorms which may become heavier and more widespread through the weekend. Fast responding and urbanised catchments are most at risk if they experience locally heavy downpours.

Minor river flooding impacts are also possible but not expected in Areas A and B on Specific Areas of Concern Map 1 this afternoon and evening, and again on Monday and Tuesday (See Specific Areas of Concern Map 3).

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Flood Guidance Statement

10:30hrs Friday 25 May 2018

Flood risk matrix

LIKELIHOOD	HIGH				
	MEDIUM				
	LOW				
	VERY LOW				
		MINIMAL	MINOR	SIGNIFICANT	SEVERE
IMPACT					
		VERY LOW	LOW	MEDIUM	HIGH
OVERALL FLOOD RISK					

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
