Minor surface water and river flooding impacts are possible but not expected on Saturday. The overall flood risk is VERY LOW.

## Assessment of flood risk

### Surface water

The surface water flood risk is VERY LOW for the next five days.

Minor surface water flooding impacts are possible but not currently expected on Saturday, mainly for parts of the south-west, central and north of England and also Wales. This is due to the potential for scattered heavy thunderstorms. Urban areas are most at risk.

### Rivers

The river flood risk is VERY LOW for the next five days.

Local minor river flooding impacts are possible but not expected on Saturday, mainly in parts of the south-west, central and north of England and also Wales. Small urban rivers and fast responding catchments are most at risk.

### Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Strong to gale force winds on Thursday will lead to some surge, large waves, spray and wave overtopping for the north-west coast of England and parts of the Welsh coastline on Thursday. However, only minimal coastal flooding impacts are expected.

Some surge may also coincide with spring tides for parts of the East coast of England on Friday morning but only minimal impacts are expected.

### Groundwater

The groundwater flood risk is VERY LOW for the next five days.

# Flood Guidance Statement

10:30hrs Wednesday 13 June 2018

## Flood risk matrix

## Summary of potential impacts

### MINIMAL

Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces

### MINOR

Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans

### SIGNIFICANT

Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans

### SEVERE

Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible
