The overall flood risk is VERY LOW for next five days.

Assessment of flood risk

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Localised minor coastal flooding impacts are possible but not expected along parts of the coastline of England and Wales today (Tuesday), due to large spring tides.

Surface water

The surface water flood risk is VERY LOW for the next five days.

On Wednesday and into Thursday there is the potential for heavy rain in the north and west of England and Wales, though any impacts are expected to be minimal.

Rivers

The river flood risk is VERY LOW for the next five days.

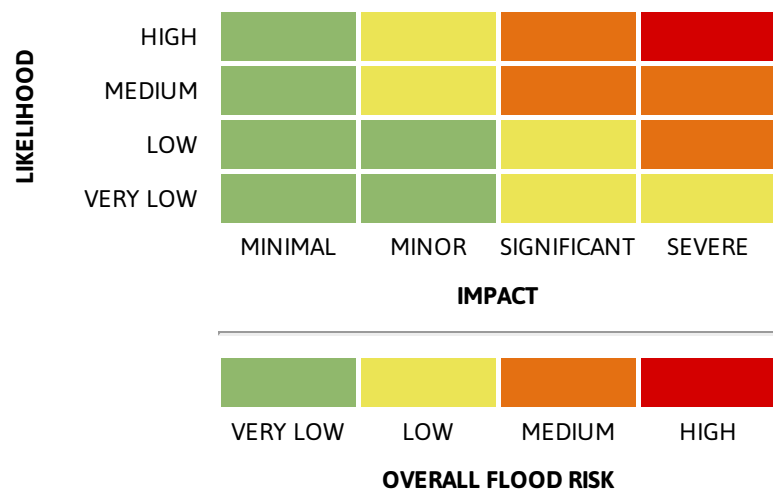

On Wednesday and into Thursday there is the potential for heavy rain in the north and west of England and Wales, though any impacts are expected to be minimal.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
