Steady

Monday

27 Aug 2018

Steady

Tuesday

28 Aug 2018

Steady

The overall flood risk is VERY LOW for next five days. Localised minor surface water flooding impacts are possible but not expected in the north of England and Wales.

Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days, despite some unsettled weather at times.

Persistent showers bring a very low likelihood of some localised minor surface water flooding impacts across parts of north-west England and north-east Wales today (Friday) and into Saturday.

Rivers

The river flood risk is VERY LOW for the next five days, despite some unsettled weather at times.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days, despite some unsettled weather at times.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
