Trend since last FGS

Steady

Monday

10 Sep 2018

Increased

Tuesday

11 Sep 2018

Increased

Wednesday

12 Sep 2018

Steady

Thursday

13 Sep 2018

Steady

Minor surface water and river flooding impacts are possible, but not expected across parts of northwest England on Monday night and into Tuesday but the overall flood risk is VERY LOW for the next five days.

Assessment of flood risk

Surface water

The surface water flood risk is very low for the next five days.

Persistent and at times heavy rain is expected Monday night and through Tuesday in parts of northwest England and north Wales. In northwest England some localised minor surface water flooding impacts are possible, but not expected.

Rivers

The river flood risk is very low for the next five days.

Persistent and at times heavy rain is expected Monday night and through Tuesday in parts of northwest England and north Wales. In northwest England some localised minor river flooding impacts are possible, but not expected.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Minimal coastal flood impacts are possible locally for some parts of the coasts of England and Wales from Monday to Wednesday due to high spring tides.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
