Minor surface water and river flooding impacts are possible but not expected across parts of north Wales and northwest England on Monday night and into Tuesday but the overall flood risk is VERY LOW for the next five days.

Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days. In north Wales and northwest England on Monday evening and Tuesday some localised minor surface water flooding impacts are possible but not expected.

Rivers

The river flood risk is VERY LOW for the next five days. In north Wales and northwest England on Monday evening and Tuesday some localised minor river flooding impacts are possible but not expected.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days. Minimal coastal flood impacts are possible locally for some parts of the coasts of England and Wales from Monday to Wednesday due to high spring tides.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood Guidance Statement

10:30hrs Monday 10 September 2018

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
