18 Sep 2018

Steady

Minor surface water and river flooding impacts are possible but not expected across parts of the north-west of England and the north of Wales on Sunday. The overall flood risk is VERY LOW for the next five days.

Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days. Localised minor surface water flooding impacts are possible but not expected in the north-west of England and the north of Wales on Sunday.

Rivers

The river flood risk is VERY LOW for the next five days. Localised minor river flooding impacts are possible but not expected in the north-west of England and the north of Wales on Sunday.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days. Later on Monday and into Tuesday there is a risk of strong winds, large waves and large surge for parts of the west and north-west coasts of England and Wales. However, with low neap tides during this period any coastal flood impacts are currently expected to be minimal.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
