Steady

The overall flood risk is VERY LOW for the next five days. See end of FGS for 6-10 day forecast.

Assessment of flood risk

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days. Despite the potential for some surge along parts of the East Anglian coast on Monday and Tuesday, only minimal flooding impacts are currently expected.

Surface water

The surface water flood risk is VERY LOW for the next five days.

Rivers

The river flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

6-10 day forecast

We are monitoring closely the possibility of some unsettled weather during the next set of spring tides - starting Sunday 7 October 2018. There is the potential for raised coastal/tidal flood risk over this spring tide period from 7 -13 October 2018.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
