Minor coastal/tidal flooding impacts are possible along parts of the east coast of England on the Saturday morning high tide. However, the overall flood risk is VERY LOW for the next five days.

## Specific Areas of Concern Map 1: Saturday 27 October.

**RISK AREA A**  
Impact **MINOR**  
Likelihood **LOW**

Source Coastal/Tidal  
Likely duration 1 Day

Coastal impacts possible on the Saturday morning high tide.

## Assessment of flood risk

### Coastal/Tidal

---

The coastal/tidal flood risk is VERY LOW for the next five days.

Localised minor coastal/tidal flooding impacts are possible for the high tide this morning along parts of the east coast of England. This is due to a surge and large waves coinciding with this tide. See coastline A in Specific Areas of Concern Map 1.

Minor coastal/tidal flooding impacts are also possible, but not expected, around other parts of the southern North Sea coast, such as the north and east facing Kent coast.

Large waves are expected to affect parts of the east coast of England again during late Monday and Tuesday with some isolated spray over-topping possible, however any impacts are expected to be minimal.

### Rivers

---

The river flood risk is VERY LOW for the next five days.

### Surface water

---

The surface water flood risk is VERY LOW for the next five days.

### Groundwater

---

The groundwater flood risk is VERY LOW for the next five days.
