The overall flood risk is VERY LOW for the next five days.

Assessment of flood risk

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Large waves are expected to affect parts of the east coast of England from late Monday and during Tuesday with some isolated spray over-topping possible, however any impacts are expected to be minimal.

Rivers

The river flood risk is VERY LOW for the next five days.

Some persistent, heavy rain may affect parts of the east of England during Tuesday, however any impacts from river flooding are expected to be minimal.

Surface water

The surface water flood risk is VERY LOW for the next five days.

Some persistent, heavy rain may affect parts of the east of England during Tuesday, however any impacts from surface water flooding are expected to be minimal.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood Guidance Statement

10:30hrs Sunday 28 October 2018

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
