The overall flood risk is VERY LOW.

Assessment of flood risk

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Today (Monday) strong winds and waves will continue to affect parts of the north-east coast of England. This may lead to some minimal impacts such as spray over topping, particularly at exposed locations.

Surface water

The surface water flood risk is VERY LOW for the next five days.

Ground conditions remain responsive across the south-west of England and with rainfall possible across this area on Wednesday and Thursday, minimal impacts from surface water flooding are possible.

Rivers

The river flood risk is VERY LOW for the next five days.

River catchments remain responsive across the south-west of England, and with rainfall possible across this area on Wednesday and Thursday, minimal impacts from river flooding are possible.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood Guidance Statement

10:30hrs Monday 10 December 2018

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
