Increased

The overall flood risk is VERY LOW. Minor surface water and river flooding impacts are possible but not expected on Saturday over parts of south Wales and south-west England.

Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days.

Minor surface water flooding impacts are possible but not expected on Saturday over parts of south Wales and south-west England due to heavy rain falling onto wet ground.

Rivers

The river flood risk is VERY LOW for the next five days.

Minor river flooding impacts are possible but not expected on Saturday over parts of south Wales and south-west England due to heavy rain falling onto wet and responsive river catchments.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood Guidance Statement

10:30hrs Tuesday 11 December 2018

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
