Steady

Minor surface water flooding impacts are possible but not expected on Wednesday and Thursday in the south and west of England and Wales. The flood risk is VERY LOW.

Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW.

Surface water flooding impacts are possible but not expected in the west of Wales and south and west of England on Wednesday and Thursday due to heavy showers.

Rivers

The river flood risk is VERY LOW.

Periods of heavy rain will be possible at times throughout this period, however any further impacts are expected to be minimal.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW.

Large waves will affect western and southern coasts though only minimal impacts are expected.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
