The overall flood risk is VERY LOW. Minor coastal flooding impacts are possible but not expected for some coasts in the north and east of England today (Saturday).

## Assessment of flood risk

### Coastal/Tidal

The overall coastal/tidal flood risk is VERY LOW.

Minor flooding impacts are possible but not expected today (Saturday) along parts of the coasts of North West England, North East England, Yorkshire, East Anglia and the tidal River Trent. Impacts may include flooding of prone individual properties and low lying land.

### Rivers

The overall river flood risk is VERY LOW for the next five days.

### Surface water

The surface water flood risk is VERY LOW for the next five days.

### Groundwater

The groundwater flood risk is VERY LOW for the next five days.

# Flood Guidance Statement

10:30hrs Saturday 23 March 2019

## Flood risk matrix

## Summary of potential impacts

### MINIMAL

Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces

### MINOR

Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans

### SIGNIFICANT

Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans

### SEVERE

Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible
