Minor surface water flooding impacts are possible but not expected on Wednesday across parts of England and Wales. The overall flood risk for the next five days is VERY LOW.

## Assessment of flood risk

### Surface water

Localised minor surface water flooding impacts are possible but not expected on Wednesday across parts of England and Wales, due to the potential for heavy showers and thundery downpours of rain. The surface water flood risk is VERY LOW for the next five days.

### Rivers

The river flood risk is VERY LOW for the next five days, despite heavy showers on Wednesday.

### Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

### Groundwater

The groundwater flood risk is VERY LOW for the next five days.

### Flood risk matrix

### Summary of potential impacts

#### MINIMAL

Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces

#### MINOR

Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans

#### SIGNIFICANT

Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans

#### SEVERE

Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible
