Steady

The overall flood risk for the next five days is VERY LOW.

Assessment of flood risk

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Despite large waves today (Saturday) around the coasts of Wales and the south and south-west of England, no more than minimal coastal impacts are expected.

Surface water

The surface water flood risk is VERY LOW for the next five days.

Although there will be heavy rain or showers at times today (Saturday), particularly across Wales and the north of England, any surface water flooding impacts are expected to be minimal.

Rivers

The river flood risk is VERY LOW for the next five days.

Rivers will continue to respond to further rainfall today across parts of Wales and central and northern England but any river flooding impacts are expected to be minimal.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood Guidance Statement

10:30hrs Saturday 27 April 2019

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
