Increased ↑

Significant river and surface water flooding impacts are possible but not expected at times in parts of the east, central and north of both England and Wales. Minor impacts are possible more widely. The overall flood risk is LOW.

Specific Areas of Concern Map 1: Tuesday 11 and Wednesday 12 June.

RISK AREA A

Impact **SIGNIFICANT**
Likelihood **VERY LOW**

Source River Surface
Likely duration 2 Days

Several periods of persistent, heavy rain.
Small urban catchments most at risk.

RISK AREA B

Impact **SIGNIFICANT**
Likelihood **VERY LOW**

Source River Surface
Likely duration 2 Days

Several periods of persistent, heavy rain.

RISK AREA C

Impact **MINOR**
Likelihood **MEDIUM**

Source River Surface
Likely duration 1 Day

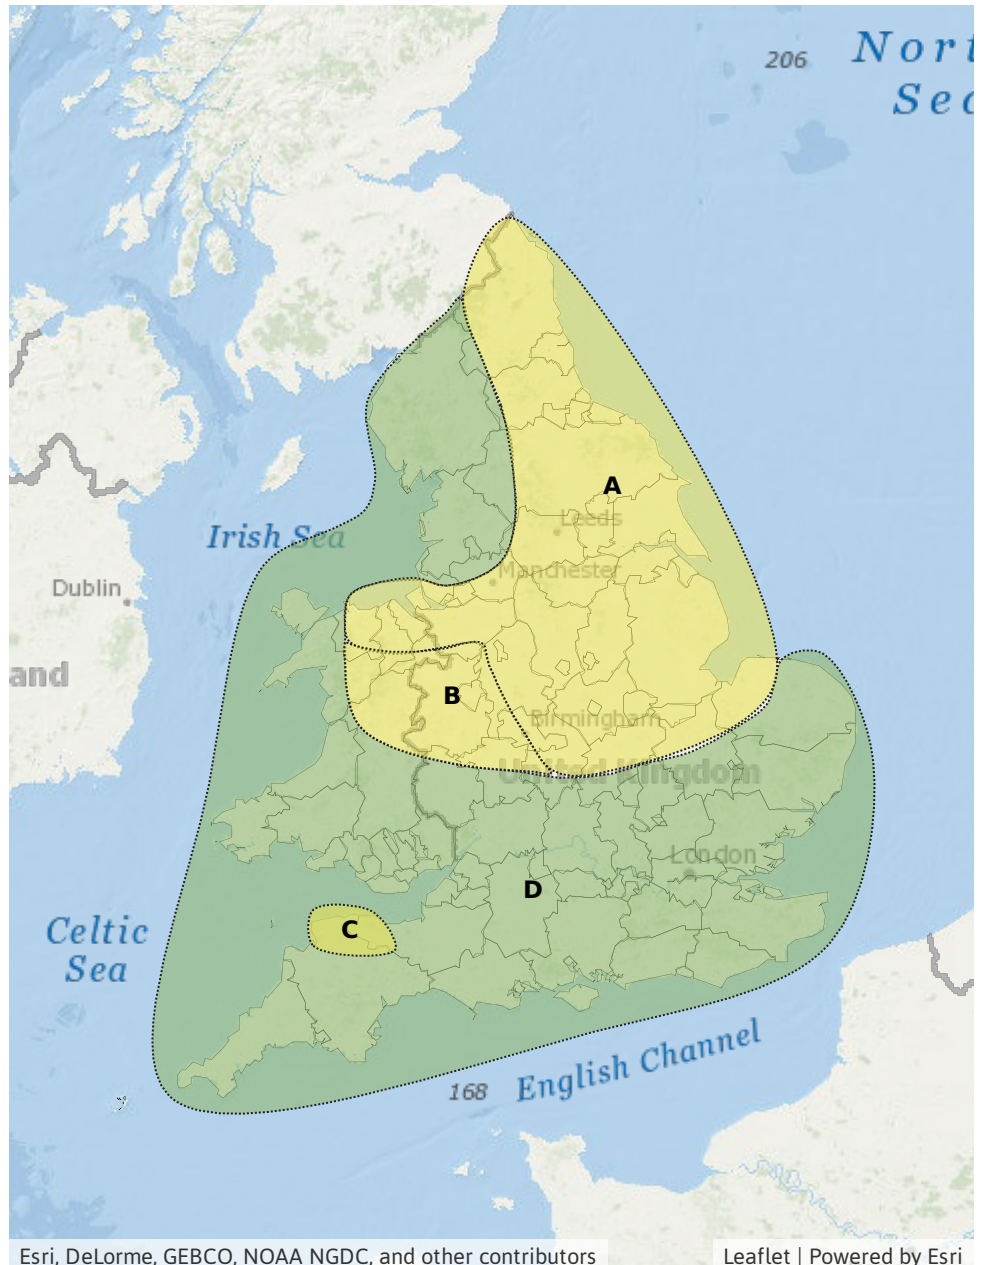

Showers followed by persistent, heavy rainfall.

RISK AREA D

Impact **MINOR**
Likelihood **LOW**

Source River Surface
Likely duration 2 Days

Flood Guidance Statement

10:30hrs Tuesday 11 June 2019

Specific Areas of Concern Map 2: Thursday 13 June

RISK AREA E

Impact **SIGNIFICANT**

Likelihood **VERY LOW**

Source River Surface

Likely duration 1 Day

Several periods of persistent, heavy rain.
Small urban catchments most at risk.

RISK AREA F

Impact **MINOR**

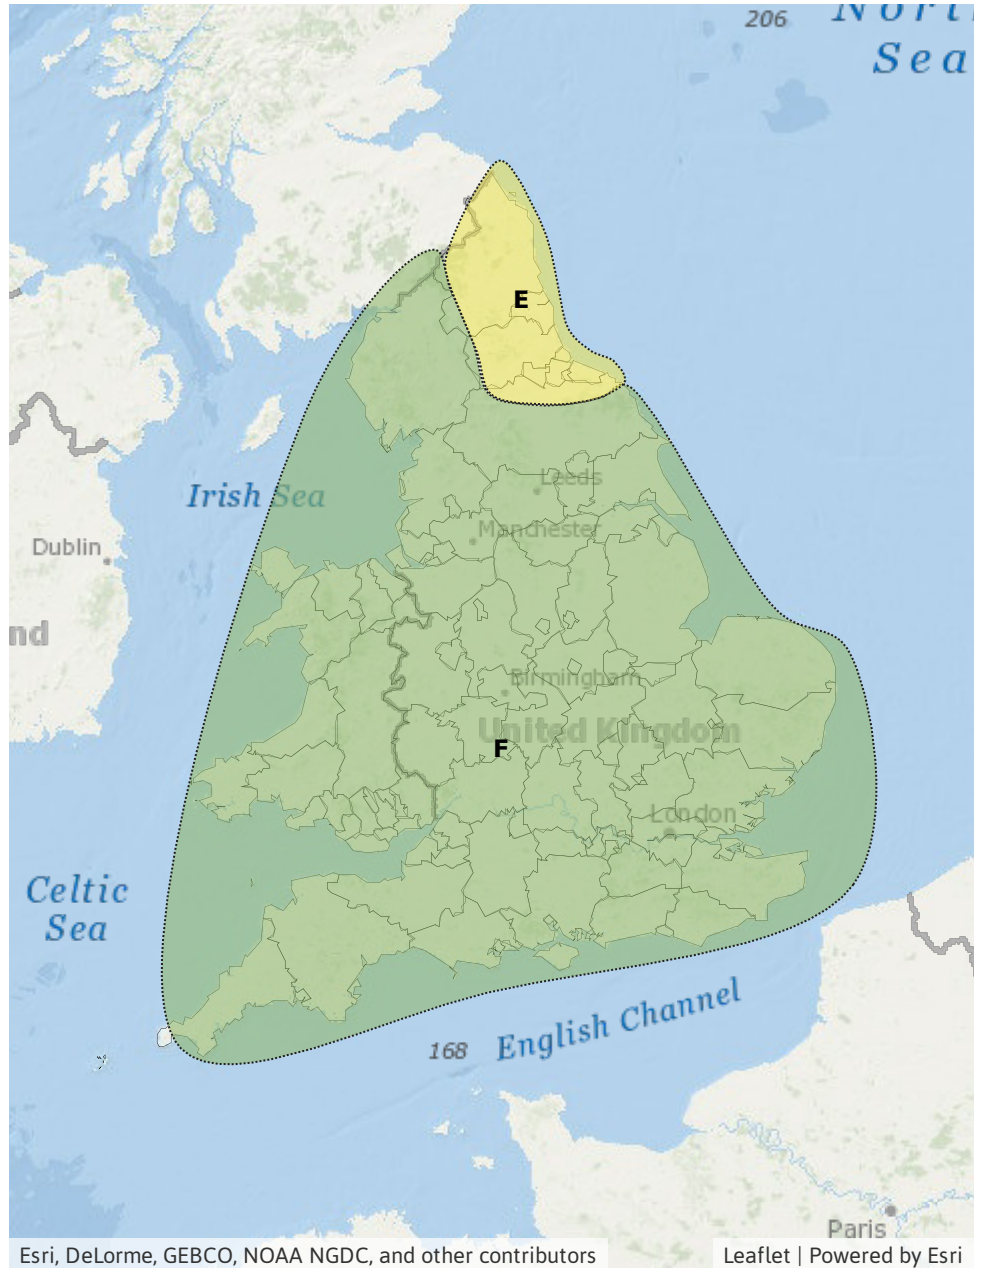

Likelihood **LOW**

Source River Surface

Likely duration 1 Day

Several periods of persistent, heavy rain
from the east then thundery showers.

Assessment of flood risk

Surface water

Periods of persistent, widespread and occasionally very heavy rainfall and thundery showers are expected to cross England and Wales from the east from today (Tuesday) through to Thursday. Significant surface water flooding impacts are possible but not expected in parts of Wales, the Midlands and the north and east of England. Urban areas are most at risk.

Minor impacts are also possible across many other parts of England and Wales through this period and are probable in the Exmoor area today (Tuesday).

On Saturday minor surface water flooding impacts are possible but not expected in the east of England.

The overall surface water flood risk is LOW.

Rivers

Periods of persistent, widespread and occasionally very heavy rainfall and thundery showers are expected to cross England and Wales from the east from today (Tuesday) through to Thursday. Significant river flooding impacts are possible but not expected in parts of north Wales, the Midlands, the north and the east of England, with small and urban catchments most at risk.

Minor impacts are also possible across many other parts of England and Wales from Monday to Thursday and are probable in the Exmoor area today (Tuesday).

On Saturday minor river flooding impacts are possible but not expected in the east of England.

The overall river flood risk is LOW.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible

Next statement due **10:30hrs Wednesday 12 June 2019 (all times are local)**
