Saturday

29 Jun 2019

Increased ↑

Minor surface water and river flooding impacts are possible but not expected this Tuesday morning in parts of England and north Wales, and on Saturday in the north of England and north Wales. The overall flood risk is VERY LOW.

Assessment of flood risk

Surface water

The overall surface water flood risk is VERY LOW.

Localised minor surface water flooding impacts are possible but not expected in parts of central and north-west England and north Wales this morning (Tuesday) due to heavy showers or thunderstorms. Minor impacts are also possible but not expected on Saturday in the north of England and Wales due to the potential for further thundery showers.

Rivers

The overall river flood risk is VERY LOW.

Localised minor river flooding impacts are possible but not expected in parts of central and north-west England and north Wales today (Tuesday) and in northern England on Saturday due to thundery showers. Smaller fast responding and urban catchments are most at risk.

Despite an improved situation overall, there is ongoing heightened sensitivity in and around Wainfleet (Lincolnshire) due to the condition of flood defence assets here.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
