Increased ↑

Minor surface water flooding impacts are possible on Thursday across much of England and Wales. The overall flood risk is **VERY LOW** for the next five days.

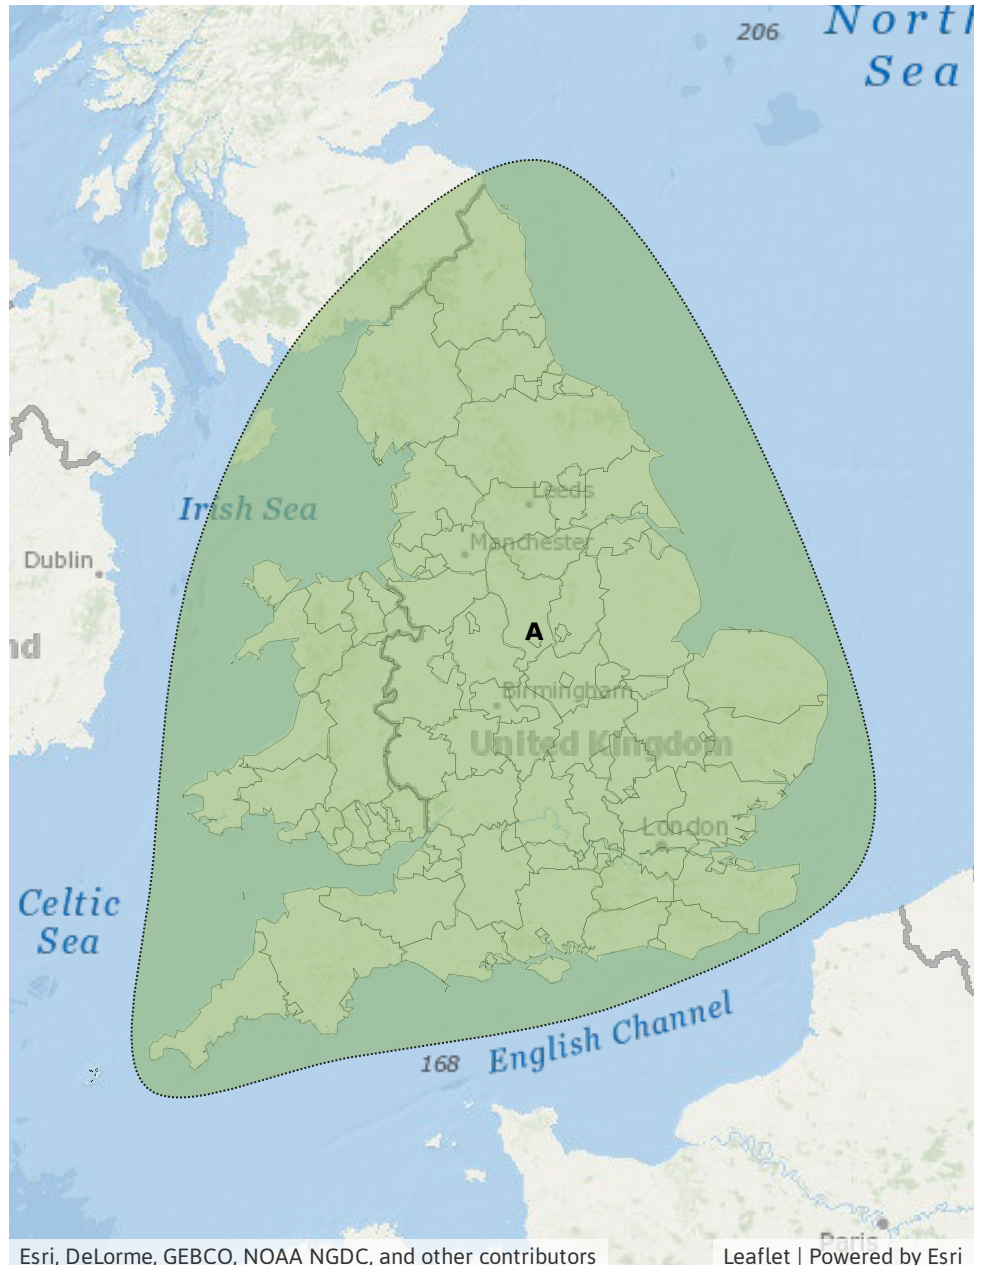

Specific Areas of Concern Map 1: Thursday 11 July 2019

RISK AREA A
Impact **MINOR**
Likelihood **LOW**

Source Surface
Likely duration 1 Day

Urban areas most at risk.

Assessment of flood risk

Surface water

Scattered, slow-moving and heavy showers could develop across much of England and Wales during Thursday afternoon and evening and possibly lead to some minor surface water flooding impacts. Urban areas are most at risk. However, the surface water flood risk is VERY LOW for the next five days.

Rivers

The river flood risk is VERY LOW for the next five days.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible

Next statement due **10:30hrs Monday 08 July 2019 (all times are local)**
