Significant surface water flooding impacts are possible but not expected on Thursday in parts of the north of England. Minor flooding impacts are also possible elsewhere on Thursday and on Friday. The overall flood risk is LOW.

## Specific Area of Concern Map 1: Thursday 11 July 2019

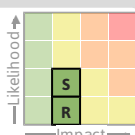

**RISK AREA A**  
Impact **SIGNIFICANT**  
Likelihood **VERY LOW**

Source River Surface  
Likely duration 1 Day

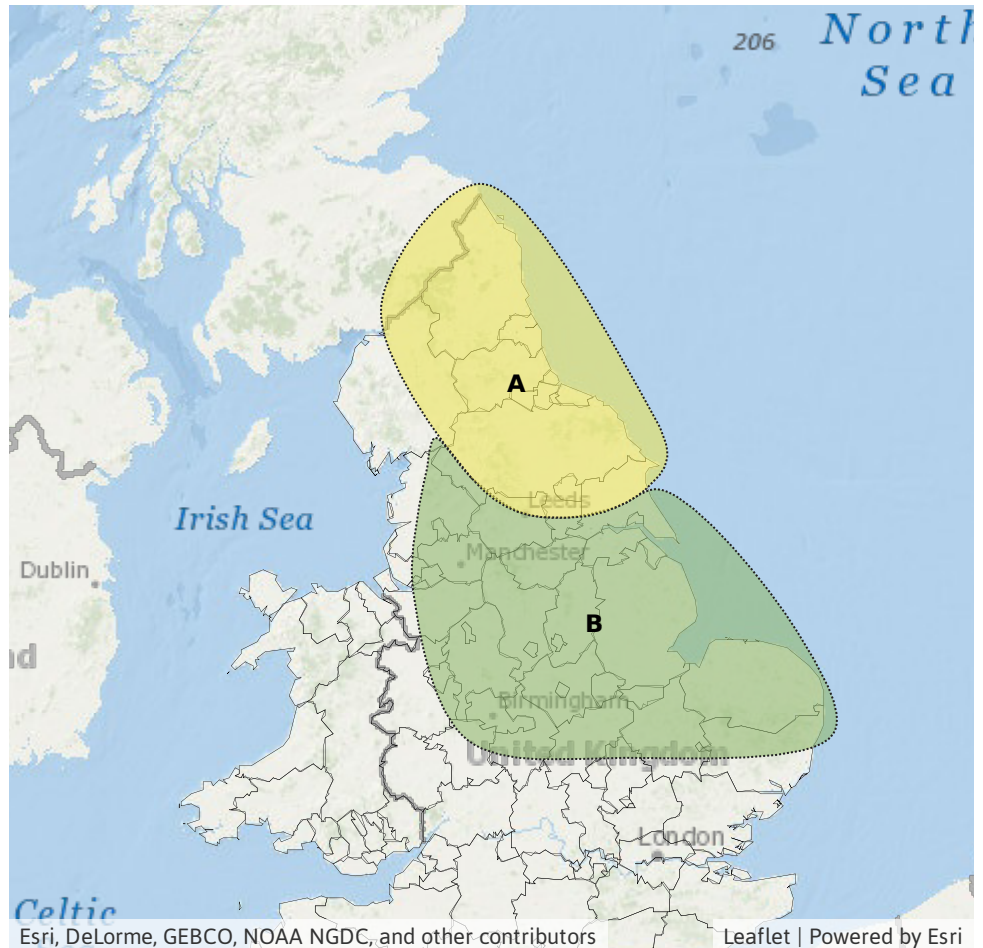

Isolated heavy thunderstorms possible PM. Urban areas most at risk.

**RISK AREA B**  
Impact **MINOR**  
Likelihood **LOW**

Source River Surface  
Likely duration 1 Day

Isolated heavy showers possible PM. Urban areas most at risk.

# Flood Guidance Statement

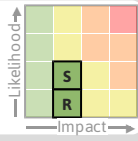

10:30hrs Thursday 11 July 2019

### Specific Area of Concern Map 2: Friday 12 July 2019

RISK AREA **C**

Impact **MINOR**

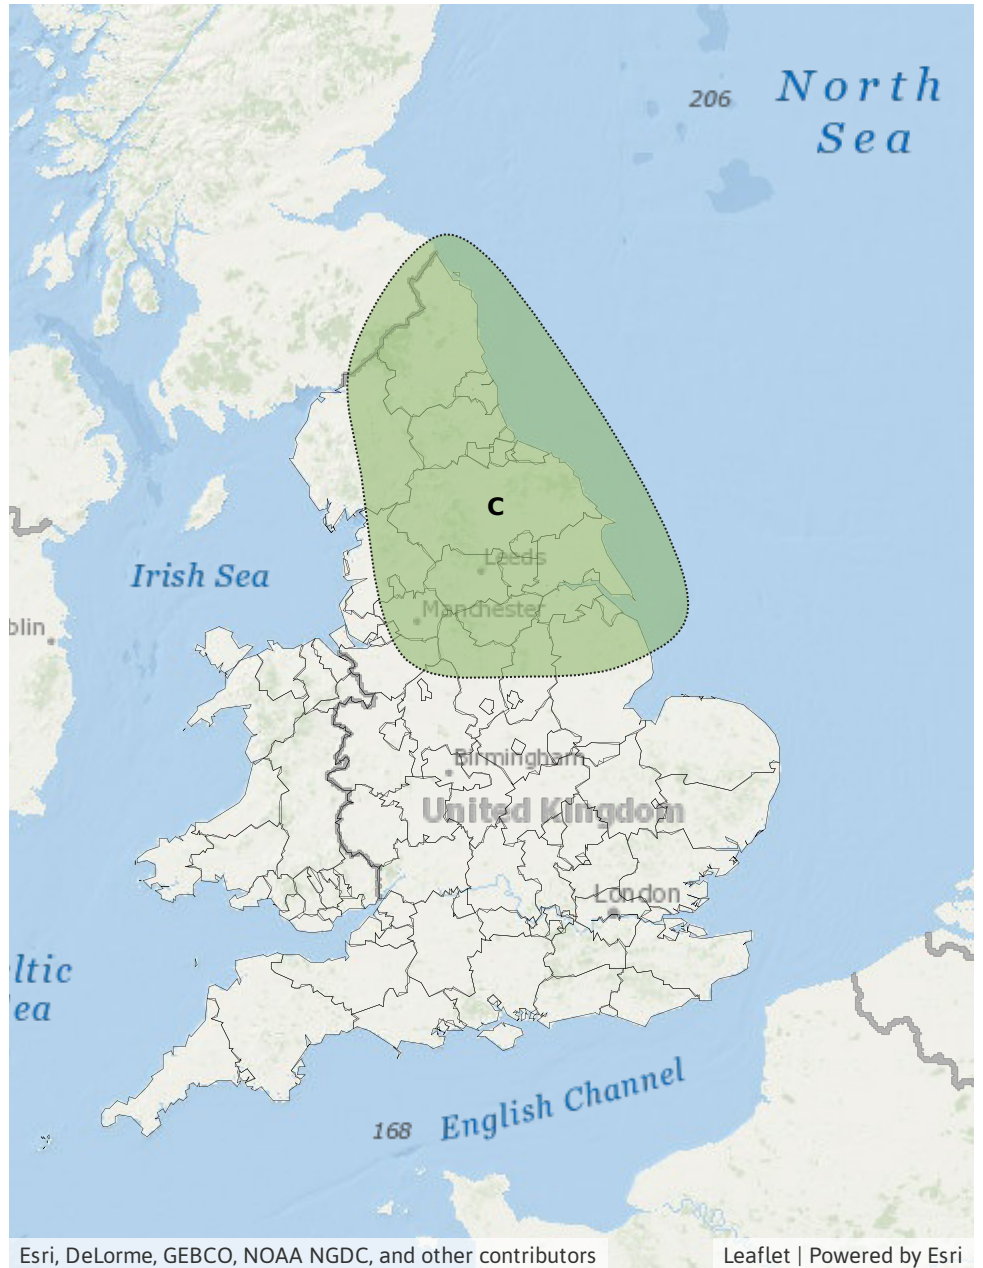

Likelihood **LOW**

Source River Surface

Likely duration 1 Day

Isolated heavy showers possible PM. Urban areas most at risk.

## Assessment of flood risk

### Surface water

---

The overall surface water flood risk is LOW.

Significant surface water flooding impacts are possible but not expected on Thursday in parts of the north of England, due to isolated heavy, thundery and slow moving showers. Minor surface water flooding impacts are also possible there and across other parts of northern England, the Midlands and East Anglia on Thursday due to heavy showers.

On Friday, isolated heavy showers may develop across northern parts of England, where local minor surface water flooding impacts are possible, while local minor surface water flooding impacts are possible but not expected across East Anglia too.

Urban areas are most at risk in the afternoon and evening on both days.

### Rivers

---

The overall river flood risk is VERY LOW for the next five days.

Minor river flooding impacts are possible but not expected in some northern, central and eastern parts of England on Thursday and Friday. This is due to the potential for isolated heavy showers or thunderstorms. Urbanised and fast-responding catchments are most at risk.

### Coastal/Tidal

---

The coastal/tidal flood risk is VERY LOW for the next five days.

### Groundwater

---

The groundwater flood risk is VERY LOW for the next five days.

### Flood risk matrix

### Summary of potential impacts

#### MINIMAL

Isolated and minor flooding of low-lying land and roads  
Isolated spray/wave on coastal promenades  
Little or no disruption to travel, but wet road surfaces

#### MINOR

Localised flooding of land and roads  
Flooding affecting individual properties  
Disruption to travel and key sites in flood plans

#### SIGNIFICANT

Flooding affecting parts of communities  
Possible danger to life and damage to buildings/structures  
Disruption to travel and key sites in flood plans

#### SEVERE

Danger to life, severe disruption to travel  
Widespread flooding affecting whole communities  
Widespread disruption or loss of infrastructure  
Large scale evacuation of properties possible

Next statement due **10:30hrs Friday 12 July 2019 (all times are local)**
