Steady

Minor surface water and river flooding impacts are possible but not expected in parts of the east and south-east of England on Thursday, and across parts of England and Wales on Friday and Saturday. The overall flood risk is VERY LOW.

Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days.

Local minor surface water flooding impacts are possible but not expected in parts of east and south-east England on Thursday, western and central parts of England and Wales on Friday, and across England and Wales on Saturday. This is due to the potential for scattered heavy showers or thunderstorms at times.

Rivers

The river flood risk is VERY LOW for the next five days.

Minor river flooding impacts are possible but not expected in fast responding and urban rivers across parts of east and south-east England on Thursday, western and central parts of England on Friday, and across England on Saturday. This is due to the potential for scattered heavy showers or thunderstorms at times.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
