

Flood Guidance Statement

10:30hrs Friday 09 August 2019

Friday 9 Aug 2019 10:30-23:59 Trend since last FGS Steady →	Saturday 10 Aug 2019 Steady →	Sunday 11 Aug 2019 Steady →	Monday 12 Aug 2019 Decreased ↓	Tuesday 13 Aug 2019 Steady →
--	---	---	--	--

Significant surface water and river flooding impacts are possible but not expected in parts of England and Wales on Friday and the north of England Saturday into Sunday. The overall flood risk is LOW. See end of FGS for 6-10 day forecast.

Specific Areas of Concern Map 1 - Friday 9 August

RISK AREA A
 Impact **SIGNIFICANT**
 Likelihood **VERY LOW**

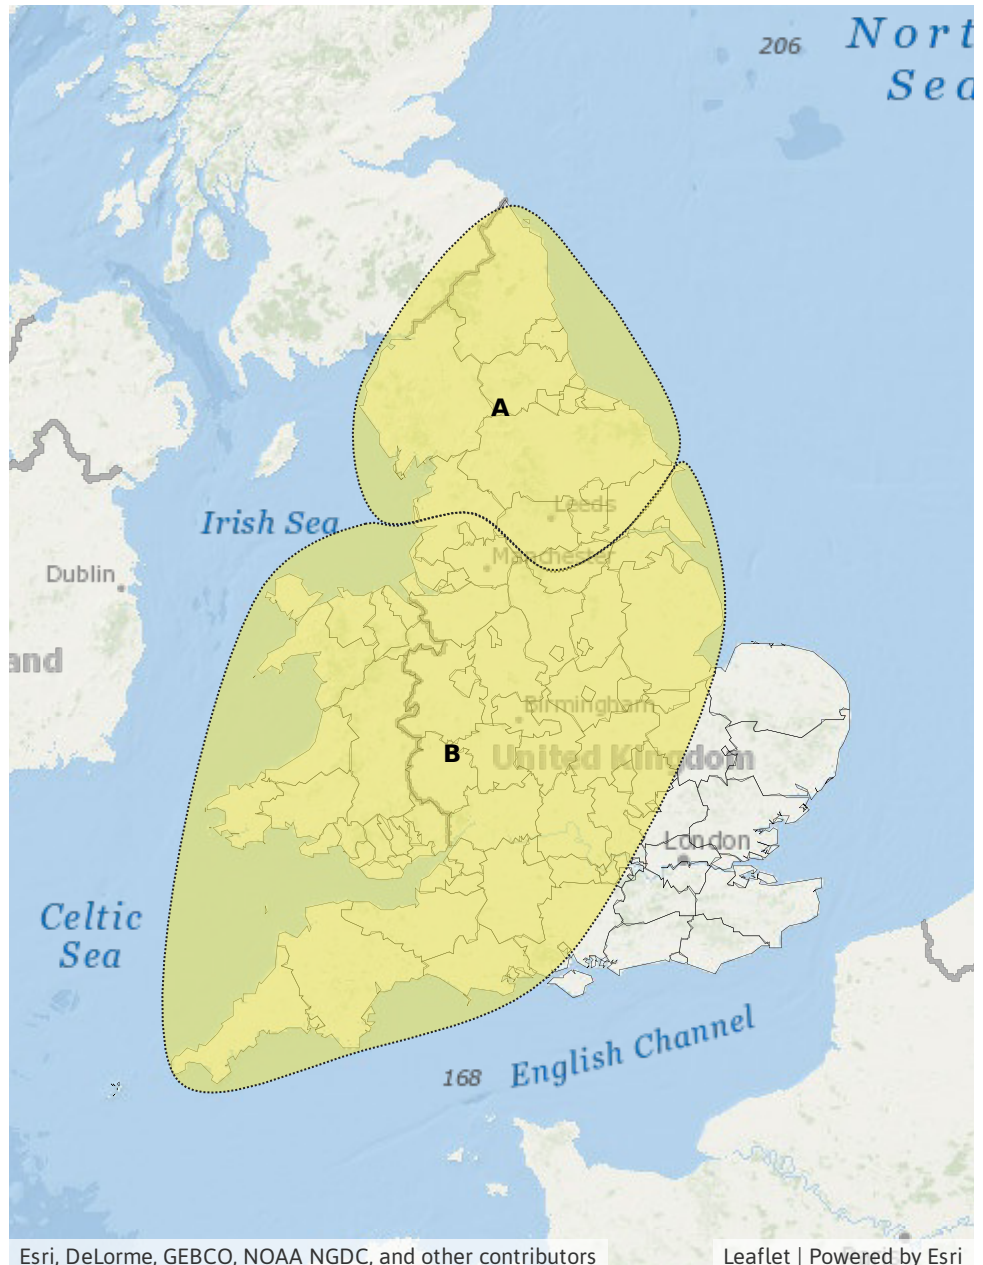

Source River Surface
 Likely duration 1 Day

Greater sensitivity in catchments that have seen recent flooding.

RISK AREA B
 Impact **SIGNIFICANT**
 Likelihood **VERY LOW**

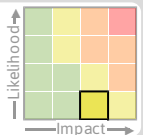

Source River Surface
 Likely duration 1 Day

Urban areas most at risk

Specific Areas of Concern Map 2 - Saturday 10 to AM Sunday 11 August

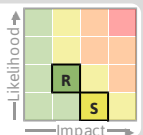

RISK AREA C
 Impact **SIGNIFICANT**
 Likelihood **VERY LOW**

Source River Surface
 Likely duration 2 Days

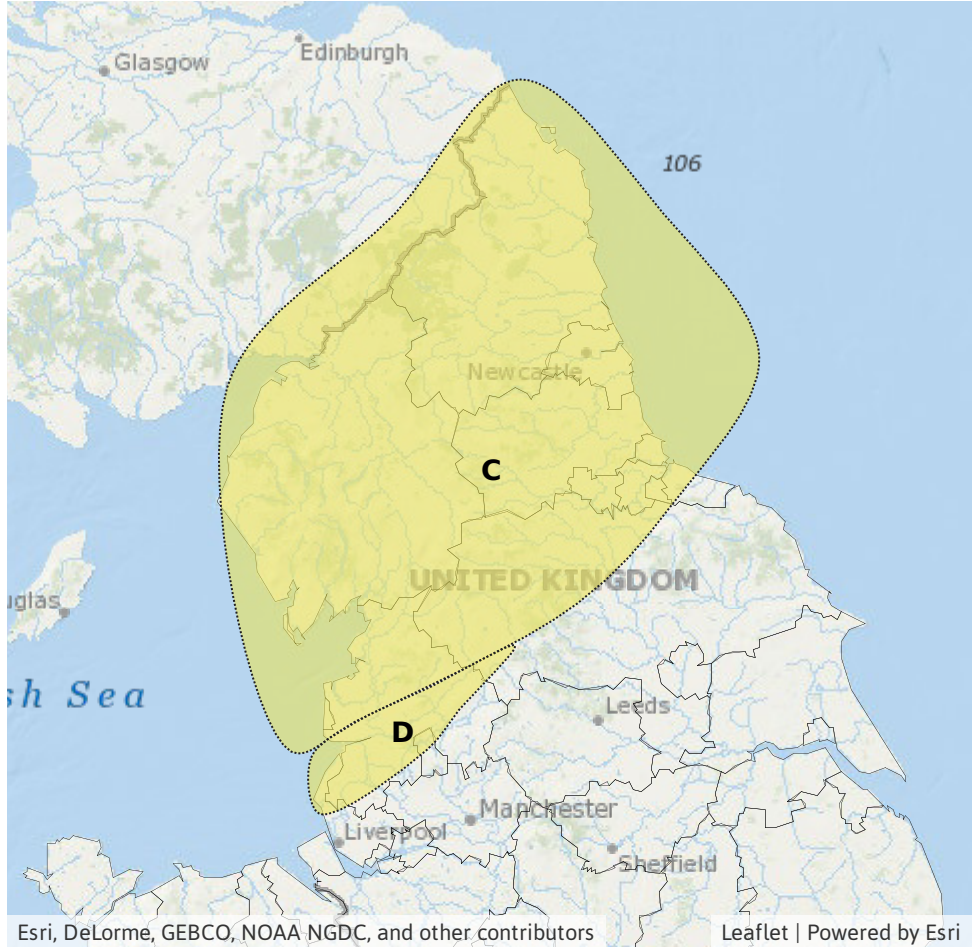

Heavy thundery showers. Urban areas and small catchments most at risk.

RISK AREA D
 Impact **SIGNIFICANT**
 Likelihood **VERY LOW**

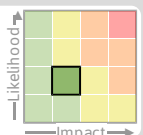

Source River Surface
 Likely duration 2 Days

Heavy thundery showers.

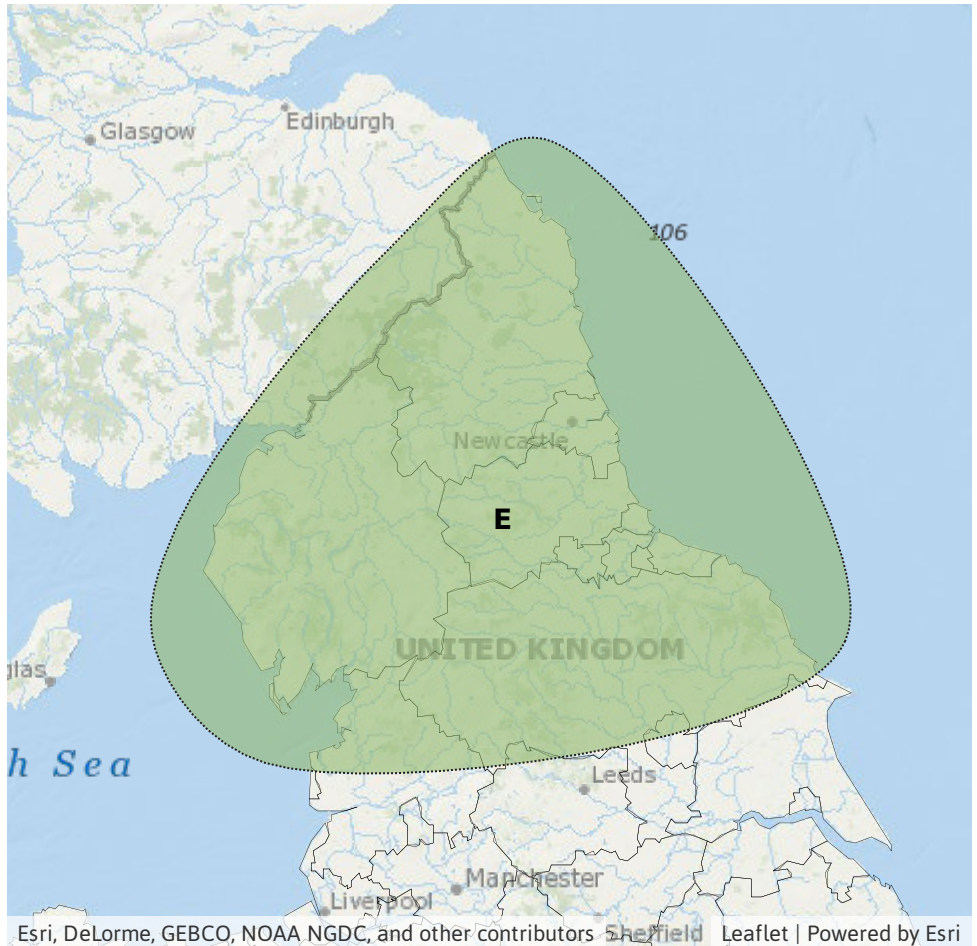

Specific Areas of Concern Map 3 - AM Sunday 11 to Monday 12 August

RISK AREA E
 Impact **MINOR**
 Likelihood **LOW**

Source River Surface
 Likely duration 2 Days

Heavy thundery showers. Urban areas and small catchments most at risk.

Assessment of flood risk

Surface water

The surface water flood risk is LOW.

Significant surface water flooding impacts are possible but not expected across many parts of England and Wales today (Friday) due to heavy showers. Significant surface water flooding impacts are possible but not expected from heavy showers on Saturday into early Sunday across parts of the north of England.

Minor surface water flooding impacts are also possible but not expected in the north of Wales on Saturday.

Minor surface water flooding impacts are possible from heavy showers through the rest of Sunday into Monday across parts of the north of England.

Rivers

The river flood risk is LOW.

Significant river flooding impacts are possible but not expected across parts of the north of England today (Friday) due heavy showers following previous widespread rain. Elsewhere, minor river flooding impacts are possible.

Significant river flooding impacts are possible but not expected from heavy showers on Saturday into early Sunday across parts of the north of England. Urban watercourses and small, fast responding river catchments are most at risk.

Minor river flooding impacts are possible from heavy showers through the rest of Sunday into Monday across parts of the north of England.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

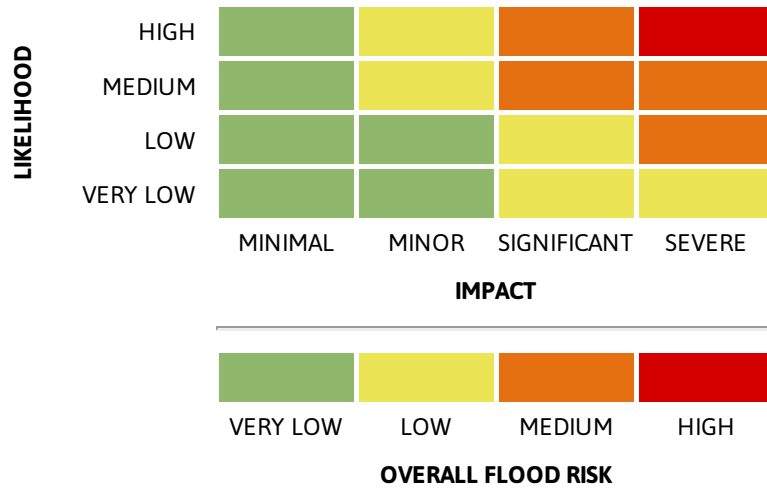

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

6-10 day forecast

Widespread heavy rain on Wednesday could affect sensitive river catchments particularly across northern England.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible

Next statement due **10:30hrs Saturday 10 August 2019 (all times are local)**
