Minor coastal flooding impacts are probable along the Wye Estuary on Saturday and Sunday. The overall flood risk is LOW.

Specific Areas of Concern Map 1 - Saturday 31 August and Sunday 1 September

RISK AREA A
Impact **MINOR**
Likelihood **MEDIUM**

Source Coastal/Tidal
Likely duration 2 Days

Coastal flooding impacts possible along the tidal River Wye during high tide

Assessment of flood risk

Coastal/Tidal

The coastal/tidal flood risk is LOW for Saturday and Sunday along the Wye Estuary, where minor flooding impacts are probable due to high spring tides - see Map 1. Minor impacts are also possible along the Mersey Estuary through the weekend.

For all other coasts, flooding impacts are expected to be minimal.

Surface water

The surface water flood risk is VERY LOW for the next five days.

Rivers

The river flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible

Next statement due **10:30hrs Saturday 31 August 2019 (all times are local)**
