19 Sep 2019 10:30-23:59
Trend since last FGS

Steady

Friday

20 Sep 2019

Steady

Saturday

21 Sep 2019

Increased

Sunday

22 Sep 2019

Increased

Monday

23 Sep 2019

Steady

Minor surface water impacts are possible but not expected across parts of England and Wales and minor river impacts are possible but not expected in parts of north-west England on Saturday and Sunday. The overall flood risk is VERY LOW.

Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days.

Some isolated minor surface water flooding impacts are possible but not expected on Saturday across parts of Wales and central and western England and more widely across England and Wales during Sunday.

Rivers

The river flood risk is VERY LOW for the next five days.

Some isolated minor river flooding impacts are possible but not expected later on Saturday and on Sunday in fast responding catchments in Cumbria and Lancashire.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
