Sunday

29 Sep 2019

Increased ↑

Significant coastal flooding impacts are possible but not expected in the Bristol Channel on Sunday. Minor coastal flooding impacts are probable in the Wye estuary on Saturday. The overall flood risk is LOW. See end of FGS for 6-10 day forecast.

Specific Areas of Concern Map 1: Sunday 29 September

RISK AREA A

Impact **SIGNIFICANT**
Likelihood **VERY LOW**

Source Coastal/Tidal
Likely duration 1 + Day

Impacts around both high tides on Sunday.
More likely on the afternoon tide.

RISK AREA B

Impact **MINOR**
Likelihood **LOW**

Source Coastal/Tidal
Likely duration 1 + Day

Impacts around both high tides on Sunday.
More likely on the afternoon tide.

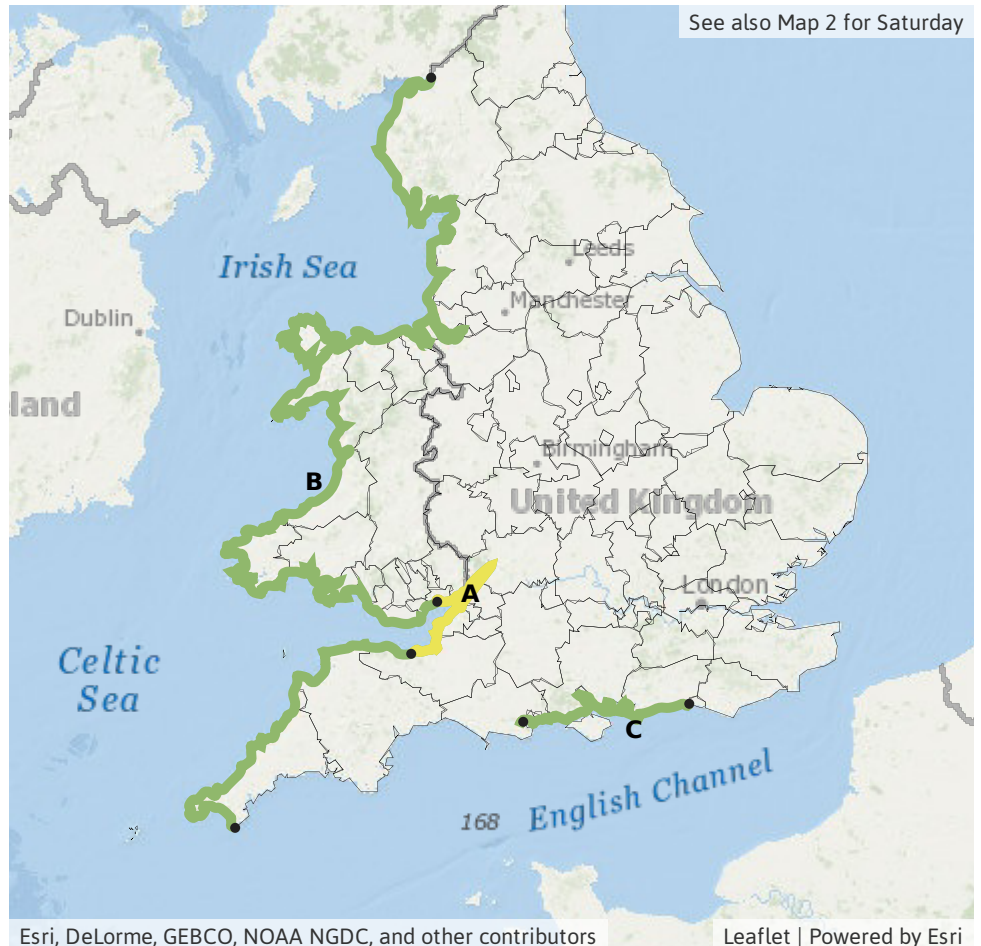

RISK AREA C

Impact **MINOR**
Likelihood **LOW**

Source Coastal/Tidal
Likely duration 1 + Day

Impacts around both high tides on Sunday.
More likely on the afternoon tide.

Flood Guidance Statement

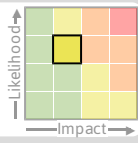

10:30hrs Wednesday 25 September 2019

Specific Areas of Concern Map 2: Saturday 28 September

RISK AREA D

Impact **MINOR**

Likelihood **MEDIUM**

Source Coastal/Tidal

Likely duration 1 Day

Impacts in the Wye estuary during the evening high tide on Saturday.

RISK AREA E

Impact **MINOR**

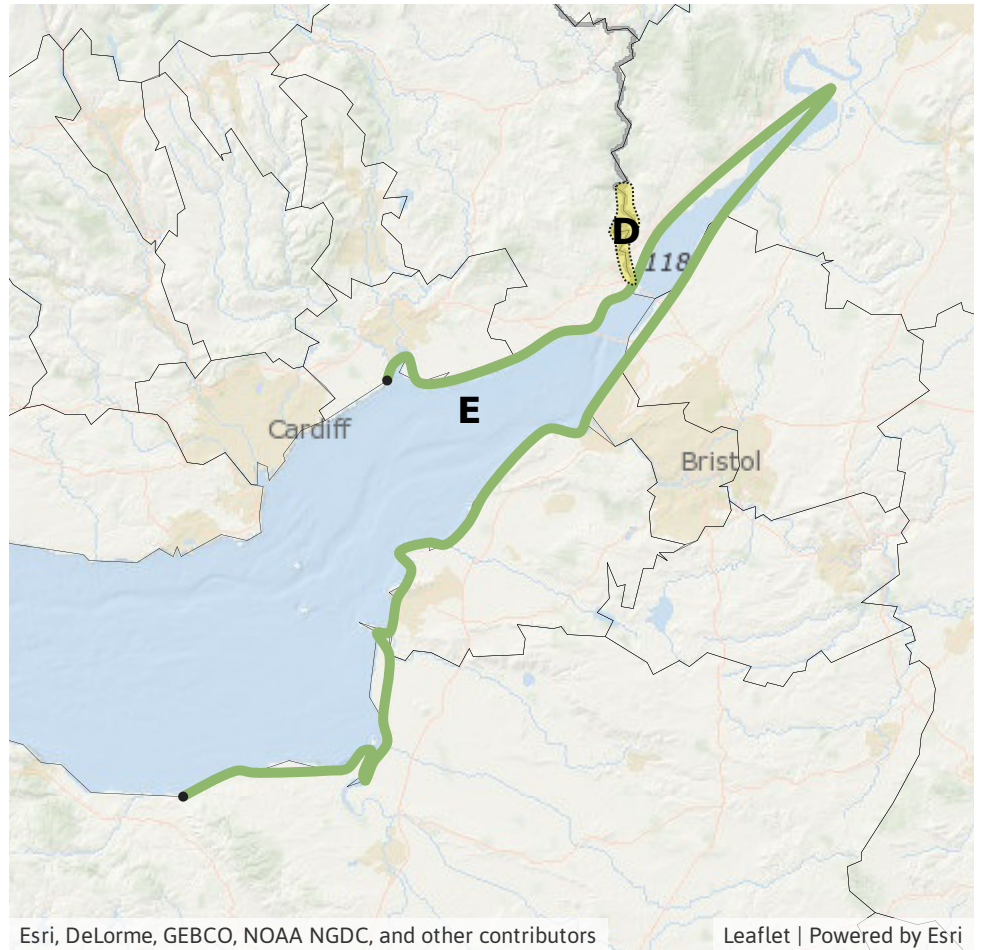

Likelihood **LOW**

Source Coastal/Tidal

Likely duration 1 Day

Impacts around the evening high tide on Saturday.

Assessment of flood risk

Coastal/Tidal

The coastal/tidal flood risk is LOW on Saturday and Sunday.

Minor coastal/tidal flooding impacts are probable in the Wye estuary on Saturday evening and are also possible in parts of the Bristol Channel.

Significant coastal/tidal flooding impacts are possible but not expected in the Bristol Channel, including the Wye estuary, on Sunday. Also on Sunday, minor coastal/tidal flooding impacts are possible but not expected around parts of the west and south coast of England and the coasts of Wales. This is due to the combination of high spring tides and strong winds.

Surface water

The surface water flood risk is VERY LOW for the next five days.

Surface water flooding impacts are possible but not expected for parts of England and Wales on Sunday due to the potential for heavy rain and/or showers.

Rivers

The river flood risk is VERY LOW for the next five days.

River flooding impacts are possible but not expected for parts of England and Wales on Sunday due to the potential for heavy rain and/or showers.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

6-10 day forecast

Unsettled weather combining with high spring tides may result in instances of coastal flooding on south and west coasts early next week. Impact levels will be highly dependent on the fine details of the weather situation which is being monitored closely.

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible

Next statement due **10:30hrs Thursday 26 September 2019 (all times are local)**
